

Inspections Required for Cat III, Small Construction Projects
This does not include projects in the City of Austin, Limited Purpose ETJ.

This is provided as general guideline information only as inspection(s) applies to the permitted project

Final Inspection – performed by ASPOA designated inspector. This is accomplished at the completion of the project. A final approved inspection, with no open re-inspection items, will be provided to ASPOA before a Certificate of Completion will be issued and construction deposit refund requested.

If a driveway permit includes a driveway (ROW) permitted by Travis County the designated inspector will verify as part of the final inspection that the ROW has passed Travis County

Driveway Inspection – performed by Travis County. This is performed for the portion of the drive in the ROW only. There are two inspections, a pre-pour and a final.

Re-Inspections are required in all conditions that are specified by the inspection report
