Not more than one single family dwelling may be erected or constructed on any one lot.

No more than one other building for garage or storage purposes.

No accessory or temporary building shall be used or occupied as living quarters.

---

**Single Family Dwelling Definition:**

A single family dwelling is a residence house designed for one family only.

A single-family (home, house, or dwelling) means that the structure consists of just one dwelling; individual, freestanding, unattached unit.

A dwelling structure that is complete in one unit and not attached to another dwelling by common walls.
